

24 Designer Powder Coat Colors for Production Lockers

Enhance your decor with
 two-tone color combinations,
 doors one color and frame
 a second color,
AT NO ADDITIONAL COST.

All surfaces shall be thoroughly cleaned with a seven stage hot-spray washing process and coated with an insoluble iron phosphate film. A high grade custom blended powder is applied by a computer controlled, highly efficient electrostatic paint system. The product is cured for 20 minutes at 350 degrees through a continuous baking oven to provide maximum paint adhesion, tough durability and a smooth paint finish.

NOTE: All body components of production KD lockers will be painted our standard neutral color, currently Parchment (choice of Parchment or Hallowell Gray for HDV body components only).

List Industries Inc.[®] does not recommend color selection from electronic media as monitor and/or printer settings may affect color appearance.

For a more accurate color selection, contact our customer service department to request a color selector or to request actual painted metal samples of colors you are considering.
